## Financial Trading and Investing John L. Teall

A former member of the American Stock Exchange introduces trading and financial markets to upper-division undergraduates and graduate students who are planning to work in the finance industry. Unlike standard investment texts that cover trading as one of many subjects, *Financial Trading and Investing* gives primary attention to trading, trading institutions, markets, and the institutions that facilitate and regulate trading activities—what economists call "market microstructure." The text will be accompanied by a website that can be used in conjunction with *TraderEx*, *Markit*, *StocklinkU*, *Virtual Trade*, *Vecon Lab Experiment*, *Tradingsim*, *IB Student Trading Lab*, *Brenexa*, *Stock Trak* and *How the Market Works*.

- Introduces the financial markets and the quantitative tools used in them so students learn how the markets operate and gain experience with their principal tools
- Helps students develop their skills with the most popular trading simulation programs so they can reuse the book to solve day-to-day problems
- Stretches from investor behavior to hedging strategies and noise trading, capturing recent advances in an up-to-date reference source
