Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series)

Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series)

Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series)
Telecommunications Network Design And Management represents the state-of-the-art of applying operations research techniques and solutions across a broad spectrum of telecommunications problems and implementation issues.

-The first three chapters of the book deal with the design of wireless networks, including UMTS and Ad-Hoc networks.
-Chapters 4-6 deal with the optimal design of telecommunications networks. Techniques used for network design range from genetic algorithms to combinatorial optimization heuristics.
-Chapters 7-10 analyze traffic flow in telecommunications networks, focusing on optimizing traffic load distribution and the scheduling of switches under multi-media streams and heavy traffic.
-Chapters 11-14 deal with telecommunications network management, examining bandwidth provisioning, admission control, queue management, dynamic routing, and feedback regulation in order to ensure that the network performance is optimized.
-Chapters 15-16 deal with the construction of topologies and allocation of bandwidth to ensure quality-of-service.

From reader reviews:

Nancy Dabney:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each e-book has different aim or even goal; it means that reserve has different type. Some people experience enjoy to spend their the perfect time to read a book. They are really reading whatever they have because their hobby is usually reading a book. Think about the person who don't like looking at a book? Sometime, individual feel need book after they found difficult problem or exercise. Well, probably you should have this Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series).

Mark Blanding:

As people who live in the actual modest era should be change about what going on or info even knowledge to make these keep up with the era and that is always change and make progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you but the problems coming to anyone is you don't know what kind you should start with. This Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series) is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

Jennifer Rogers:

Spent a free a chance to be fun activity to try and do! A lot of people spent their free time with their family, or their friends. Usually they performing activity like watching television, likely to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Can be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the guide untitled Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series) can be excellent book to read. May be it can be best activity to you.

Harriett Costello:

Is it a person who having spare time then spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This Telecommunications Network Design and Management (Operations Research/Computer Science Interfaces Series) can be the reply, oh how comes? A fresh book you know. You are and so out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?
