The Becoming of Time: Integrating Physical and Religious Time Lawrence W. Fagg

Now available in an updated addition:

Integrating concepts of time derived from the physical sciences and world religions, *The Becoming of Time* examines various questions about time, including its origin, its relation to space and motion, its irreversible nature, the notion of timelessness, and the reality of the future. Lawrence W. Fagg contends that the use of spatial metaphors to describe time obscures its true character. He offers an alternative, non-spatial description of time by developing the concept of time as becoming.

"This lucid and wide-ranging study sets out to reconcile the objective and subjective perspectives in the investigation of the phenomenon of time. [Lawrence W. Fagg] . . . explores the wondrous subtleties of time that modern physics continues to reveal, but complements them with the rich insights of the spiritual perspectives on time that the world's major religions have to offer."—Helga Nowotny, Former President, International Society for the Study of Time

"Lawrence W. Fagg has made a fundamental contribution to our reflection upon time. His work immediately takes its place as a basic text for students and researchers, from college to seminary and university levels."—Philip Hefner, Director, Zygon Center for Religion and Science
