The Mycoplasmas, Volume II: Human and Animal Mycoplasmas is a volume of a comprehensive three-volume series encompassing various facets of mycoplasmaology. This volume shows the knowledge about mycoplasmal diseases of man, including those involving the respiratory and genitourinary tracts. Detailed information on the humoral and cellular immune responses to mycoplasmas, which are assuming an ever-increasing significance in the understanding of the pathogenesis of human and animal mycoplasmal diseases, is also given. This book will serve as a standard reference work for mycoplasmaologists, as well as for other interested microbiologists, cellular and molecular biologists, membrane biochemists, clinicians, veterinarians, plant pathologists, and entomologists.
