## **Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses)** Cilli Sobiech

This thesis constitutes an extraordinary innovative research approach in transferring the concepts and methods of complex systems to risk research. It ambitiously bridges the barriers between theoretical, empirical and methodical research work and integrates these fields into one comprehensive approach of dealing with uncertainty in socio-ecological systems. The developed agent-based simulation aims at the dynamics of social vulnerability in the considered system of the German North Sea Coast. Thus, the social simulation provides an analytical method to explore the individual, relational, and spatial aspects leading to dynamics of vulnerability in society. Combining complexity science and risk research by the method of agent-based simulation hereby emphasizes the importance of understanding interrelations inside the system for the system's development, i.e. for the evolving. Based on a vulnerability assessment regarding vulnerability characteristics, present risk behavior and self-protection preferences of private households against the impacts of flooding and storm surges, possible system trajectories could be explored by means of simulation experiments. The system-analytical approach therefore contributes to an integrated consideration of multi-dimensional and context-sensitive social phenomena such as vulnerability. Furthermore it achieves conceptually and strategically relevant implications for risk research and complex systems research.

### **From reader reviews:**

#### **Wilma Shay:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite publication and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses). Try to make the book Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) as your close friend. It means that it can to be your friend when you really feel alone and beside those of course make you smarter than ever. Yeah, it is very fortunated for you. The book makes you more confidence because you can know almost everything by the book. So , let me make new experience as well as knowledge with this book.

#### **Olive Griffin:**

Have you spare time for the day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a wander, shopping, or went to the actual Mall. How about open or maybe read a book called Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses)? Maybe it is being best activity for you. You already know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with its opinion or you have some other opinion?

#### **Lloyd Stec:**

Information is provisions for anyone to get better life, information presently can get by anyone on everywhere. The information can be a expertise or any news even restricted. What people must be consider any time those information which is inside former life are challenging be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you get the unstable resource then you understand it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) as your daily resource information.

#### **Gloria Lafreniere:**

Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) can be one of your nice books that are good idea. All of us recommend that straight away because this book has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to get every word into enjoyment arrangement in writing Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) although doesn't forget the main level, giving the reader the hottest and also based confirm resource facts that maybe you can be certainly one of it. This great information may drawn you into new stage of crucial pondering.
