## Human Factors in Simulation and Training

Measure twice, cut once. Although applicable to all areas of human factors research, the old adage is especially relevant to simulation and training. As a tool, simulation is an aid to the imagination, however, if incorrectly or inadequately used, it can lead to inaccurate outcomes that not only limit the possibilities but potentially cause harm. A comprehensive overview of the topic from a human factor perspective, **Human Factors in Simulation and Training** not only reflects the state-of-the art but also integrates the literature on simulation into a cohesive resource.

The editors have collected chapters on a wide variety of topics, beginning with theory and application in areas ranging from traditional training to augmented reality to virtual reality. This coverage includes surface ships, submarines, naval aviation, commercial aviation, space, and medicine. The theory based section focuses on human factors aspects of simulation and training ranging from the history of simulators and training devices, to future trends in simulation from both a civilian and military perspective. The chapters expand on concepts regarding simulator usage particularly with respect to the validity and functionality of simulators as training devices. They contain in depth discussions of specific issues including fidelity, interfaces and control devices, transfer of training, simulator sickness, effects of motion in simulated systems, and virtual reality.

As more, and more sophisticated, simulation tools and training technologies become available, a complete understanding of how to use them appropriately will be even more crucial. Elucidating theory and application, the book addresses numerous issues and concepts pertaining to human factors in simulation and training, making this volume an important addition to the bookshelf of any human factors professional.

### **From reader reviews:**

#### **Michael Yancey:**

The guide with title Human Factors in Simulation and Training possesses a lot of information that you can learn it. You can get a lot of profit after read this book. This specific book exist new information the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. This kind of book will bring you in new era of the globalization. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

#### **Steve Domingo:**

Reading can called thoughts hangout, why? Because when you find yourself reading a book specifically book entitled Human Factors in Simulation and Training your head will drift away trough every dimension, wandering in each and every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging just about every word written in a reserve then become one type conclusion and explanation in which maybe you never get before. The Human Factors in Simulation and Training giving you another experience more than blown away the mind but also giving you useful details for your better life in this particular era. So now let us present to you the relaxing pattern this is your body and mind are going to be pleased when you are finished reading through it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

#### **John Sherman:**

This Human Factors in Simulation and Training is great publication for you because the content that is certainly full of information for you who else always deal with world and also have to make decision every minute. This particular book reveal it data accurately using great coordinate word or we can claim no rambling sentences included. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but difficult core information with wonderful delivering sentences. Having Human Factors in Simulation and Training in your hand like having the world in your arm, info in it is not ridiculous one particular. We can say that no publication that offer you world inside ten or fifteen tiny right but this e-book already do that. So , this really is good reading book. Heya Mr. and Mrs. active do you still doubt that will?

#### **Sharon Brogdon:**

Many people spending their time frame by playing outside having friends, fun activity along with family or just watching TV the whole day. You can have new activity to enjoy your whole day by studying a book. Ugh, you think reading a book really can hard because you have to accept the book everywhere? It okay you can have the e-book, getting everywhere you want in your Cell phone. Like Human Factors in Simulation and Training which is finding the e-book version. So , try out this book? Let's see.
