**Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics)** Yang Yang, Kenneth C. Land

**Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications** is based on a decade of the authors' collaborative work in age-period-cohort (APC) analysis. Within a single, consistent HAPC-GLMM statistical modeling framework, the authors synthesize APC models and methods for three research designs: age-by-time period tables of population rates or proportions, repeated cross-section sample surveys, and accelerated longitudinal panel studies. The authors show how the empirical application of the models to various problems leads to many fascinating findings on how outcome variables develop along the age, period, and cohort dimensions.

The book makes two essential contributions to quantitative studies of time-related change. Through the introduction of the GLMM framework, it shows how innovative estimation methods and new model specifications can be used to tackle the "model identification problem" that has hampered the development and empirical application of APC analysis. The book also addresses the major criticism against APC analysis by explaining the use of new models within the GLMM framework to uncover mechanisms underlying age patterns and temporal trends.

Encompassing both methodological expositions and empirical studies, this book explores the ways in which statistical models, methods, and research designs can be used to open new possibilities for APC analysis. It compares new and existing models and methods and provides useful guidelines on how to conduct APC analysis. For empirical illustrations, the text incorporates examples from a variety of disciplines, such as sociology, demography, and epidemiology. Along with details on empirical analyses, software and programs to estimate the models are available on the book's web page.

### **From reader reviews:**

#### **Mohammed Thomas:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite reserve and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics). Try to stumble through book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) as your good friend. It means that it can be your friend when you sense alone and beside associated with course make you smarter than ever. Yeah, it is very fortunate to suit your needs. The book makes you far more confident because you can know anything by the book. So, let's make new experience in addition to knowledge with this book.

#### **Tyler Emery:**

Often the book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) has a lot of information on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. The writer makes some research before write this book. This specific book very easy to read you may get the point easily after looking over this book.

#### **Sherry Holsey:**

That guide can make you to feel relax. That book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) was colourful and of course has pictures around. As we know that book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) has many kinds or style. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and think you are the character on there. So, not at all of book are usually make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you and try to like reading that.

#### **Steven Young:**

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information from a book. Book is published or printed or descriptive from each source in which filled update of news. On this modern era like at this point, many ways to get information are available for you. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) when you desired it?
