## **Ecology and Silviculture of Eucalypt Forests** R.G. Florence

This classic forest management text examines the ecology and silviculture of eucalypts in forests and plantations in Australia and overseas. The book presents approaches to the formulation of ecologically sustainable forest practices through a more fundamental understanding of Eucalyptus.

The 14 chapters of the book are divided into three sections covering: the ecological background to silvicultural practice; the regeneration and continuing development of the forests; and silvicultural practice, including the current practices within the eucalypt forests.
