The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) Robert Axelrod

Robert Axelrod is widely known for his groundbreaking work in game theory and complexity theory. He is a leader in applying computer modeling to social science problems. His book *The Evolution of Cooperation* has been hailed as a seminal contribution and has been translated into eight languages since its initial publication. The *Complexity of Cooperation* is a sequel to that landmark book. It collects seven essays, originally published in a broad range of journals, and adds an extensive new introduction to the collection, along with new prefaces to each essay and a useful new appendix of additional resources. Written in Axelrod's acclaimed, accessible style, this collection serves as an introductory text on complexity theory and computer modeling in the social sciences and as an overview of the current state of the art in the field.

The articles move beyond the basic paradigm of the Prisoner's Dilemma to study a rich set of issues, including how to cope with errors in perception or implementation, how norms emerge, and how new political actors and regions of shared culture can develop. They use the shared methodology of agent-based modeling, a powerful technique that specifies the rules of interaction between individuals and uses computer simulation to discover emergent properties of the social system. *The Complexity of Cooperation* is essential reading for all social scientists who are interested in issues of cooperation and complexity

From reader reviews:

Toni Styer:

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite reserve and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the e-book entitled The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity). Try to make the book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) as your friend. It means that it can to be your friend when you truly feel alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated to suit your needs. The book makes you more confidence because you can know anything by the book. So , let us make new experience as well as knowledge with this book.

Russell Belcher:

The book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) can give more knowledge and information about everything you want. Why then must we leave a good thing like a book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity)? A number of you have a different opinion about guide. But one aim which book can give many information for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or info that you take for that, you are able to give for each other; you may share all of these. Book The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) has simple shape however you know: it has great and large function for you. You can search the enormous world by open up and read a book. So it is very wonderful.

Carlos Vickers:

Reading a publication can be one of a lot of action that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people love it. First reading a book will give you a lot of new facts. When you read a guide you will get new information since book is one of various ways to share the information as well as their idea. Second, reading through a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, you can share your knowledge to others. When you read this The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity), it is possible to tells your family, friends along with soon about yours e-book. Your knowledge can inspire average, make them reading a e-book.

Bernard Taylor:

In this era globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher that print many kinds of book. Typically the book that recommended to you personally is The Complexity of Cooperation: Agent-Based Models of Competition and Collaboration: Agent-Based Models of Competition and Collaboration (Princeton Studies in Complexity) this book consist a lot of the information in the condition of this world now. This specific book was represented so why is the world has grown up. The language styles that writer require to explain it is easy to understand. The particular writer made some investigation when he makes this book. That's why this book acceptable all of you.
