### Master the most important investing skill of all—DECISION MAKING

*“De-risking your investments requires knowing that there is much you don’t know.”*

—David X Martin

Risk exists because of one simple fact: Decisions are always based on incomplete information. Therefore, to meet your investment goals over the long term, you must learn to manage the risks associated with a decision-making process that is by nature flawed. *Risk and the Smart Investor* provides a framework for making such decisions.

Avoiding unrealistic promises of completely risk-free investing, world-renowned risk management expert David X Martin familiarizes you with the principles of risk management. Based on Martin’s experience in managing risk at several of the world’s largest financial institutions, this principlebased approach presents a unique perspective that helps you manage the risk in every investment you make.

*Risk and the Smart Investor* provides not only a framework for managing risk in today’s markets, it also prepares you to handle the next financial crisis—which is coming, sooner or later—by separating risk management into four separate processes:

- **Assessment**—know where you are, but accept the fact that you cannot know everything
- **The Rules of the Game**—determine your appetite for risk, diversify accordingly, demand transparency, and institute checks and balances
- **Decision Making**—consider all alternatives, fit your plans into specific time frames, and always have an exit strategy
- **Reevaluation**—continually monitor the outcomes of your decisions and learn from your mistakes
