**The Economic and Social Structure of Mauritius (Routledge Library Editions: Development)** James E Meade

First published in 1961, this reissue examines the contemporary economic problems of Mauritius alongside those social problems which have a bearing on economic development. As a small and isolated economy, marked by a very rapid rate of contemporary population growth, by an extreme concentration on a single product, and by a great diversity of racial, religious and linguistic groups within the population, Mauritius is a representative microcosm of the economic problems of a large part of the developing world. The book considers the impact of a lower birth rate, emigration and economic development upon the economy of Mauritius, examining in detail the labour market, the prospects for agricultural and industrial development, the financial system and the education system.
