Understanding and Evaluating Research in Applied and Clinical Settings George A. Morgan, Jeffrey A. Gliner, Robert J. Harmon

Clinically oriented professionals and students need to understand and evaluate the research and statistics in professional articles, especially given today's emphasis on evidence-based practice. This book demonstrates how the research approach and design help determine the appropriate statistical analysis. *Understanding and Evaluating Research in Applied and Clinical Settings* features:

- *short, independent, chapters that do not have to be read in order;
- *a guide to understanding why a particular statistic was selected;
- *an emphasis on effects sizes including measures of risk potency;
- *numerous cross-disciplinary examples to illustrate the material; and
- *methods to help determine practical and clinical significance and their relation to meta-analysis and evidence-based practice.

This book is intended for practitioners and students in psychology, education, counseling, mental and allied health, nursing, and medicine, and as a text for courses on understanding research methods and statistics.
