Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series)

Tom Leinster

Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) Tom Leinster Higher-dimensional category theory is the study of n-categories, operads, braided monoidal categories, and other such exotic structures. It draws its inspiration from areas as diverse as topology, quantum algebra, mathematical physics, logic, and theoretical computer science. The heart of this book is the language of generalized operads. This is as natural and transparent a language for higher category theory as the language of sheaves is for algebraic geometry, or vector spaces for linear algebra. It is introduced carefully, then used to give simple descriptions of a variety of higher categorical structures. In particular, one possible definition of n-category is discussed in detail, and some common aspects of other possible definitions are established. This is the first book on the subject and lays its foundations. It will appeal to both graduate students and established researchers who wish to become acquainted with this modern branch of mathematics.

From reader reviews:

Gilbert Johnson:

Reading can called head hangout, why? Because while you are reading a book specially book entitled Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) your brain will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging each and every word written in a guide then become one application form conclusion and explanation which maybe you never get prior to. The Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) giving you yet another experience more than blown away the mind but also giving you useful data for your better life in this particular era. So now let us teach you the relaxing pattern at this point is your body and mind will be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Buddy Stewart:

Are you kind of active person, only have 10 or even 15 minute in your time to upgrading your mind talent or thinking skill even analytical thinking? Then you are having problem with the book in comparison with can satisfy your short period of time to read it because this all time you only find publication that need more time to be read. Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) can be your answer since it can be read by a person who have those short extra time problems.

Rosemary Perez:

Is it a person who having spare time after that spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) can be the respond to, oh how comes? It's a book you know. You are and so out of date, spending your free time by reading in this new era is common not a geek activity. So what these publications have than the others?

Luis Gonzalez:

That e-book can make you to feel relax. This specific book Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) was vibrant and of course has pictures on there. As we know that book Higher Operads, Higher Categories (London Mathematical Society Lecture Note Series) has many kinds or genre. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading that will.
