## **Computerized Basin Analysis: The Prognosis of Energy and Mineral Resources (Computer Applications in the Earth Sciences)**

This symposium on 'Computerized Basin Analysis for Prognosis of Energy - and Mineral Resources' was organized by Dr. Jan Harff, chairman of the Scientific Committee for the meeting, in Giistrow in what was then East Germany. Sponsors of this meeting were the International Union of Geological Sciences' Commission on Storage, Automatic Processing and Retrieval of Geologic Data (COGEODATA), Academy of Sciences of the German Democratic Republic (GDR), National Oil and Gas Trust of the GDR, and the International Association for Mathematical Geology (IAMG). Main topics of the symposium, held from 19-22 June 1990, were application of computer methods to the exploration and exploitation of oil and gas, coal, and other energy and mineral resources. There were computer demonstrations as well as a one-day field trip to the geothermic heating plant in Waren. The Regional Group for Eastern Europe of COGEODATA also met during the conference. Fifty-one papers were presented including eight poster sessions by authors from 14 countries. As was to be expected, there was a large percentage of papers from the East Bloc of European countries, especially the GDR, USSR, and the CSSR with a fair representation from the FRG and USA and a smattering from the nine others. Most of the papers were application oriented and related to the mineral industries. There was ample time for exchange of ideas and dissemination of material.

### **From reader reviews:**

#### **John Caldwell:**

The publication untitled Computerized Basin Analysis: The Prognosis of Energy and Mineral Resources (Computer Applications in the Earth Sciences) is the book that recommended to you to read. You can see the quality of the publication content that will be shown to anyone. The language that creator use to explained their way of doing something is easily to understand. The author was did a lot of study when write the book, therefore the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Computerized Basin Analysis: The Prognosis of Energy and Mineral Resources (Computer Applications in the Earth Sciences) from the publisher to make you considerably more enjoy free time.

#### **Shannon Lynch:**

A lot of people always spent their own free time to vacation or go to the outside with them family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you need to try to find a new activity that's look different you can read some sort of book. It is really fun for you. If you enjoy the book you read you can spent the whole day to reading a book. The book Computerized Basin Analysis: The Prognosis of Energy and Mineral Resources (Computer Applications in the Earth Sciences) it doesn't matter what good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In case you did not have enough space bringing this book you can buy the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not too expensive but this book offers high quality.

#### **Ronald Johnson:**

Are you kind of stressful person, only have 10 or perhaps 15 minute in your day time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your short period of time to read it because this all time you only find publication that need more time to be examine. Computerized Basin Analysis: The Prognosis of Energy and Mineral Resources (Computer Applications in the Earth Sciences) can be your answer because it can be read by you who have those short spare time problems.

#### **Henry Hedrick:**

Is it an individual who having spare time in that case spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something new? This Computerized Basin Analysis: The Prognosis of Energy and Mineral Resources (Computer Applications in the Earth Sciences) can be the respond to, oh how comes? A book you know. You are and so out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?
