Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology) Patrick Van Bogaert

Epileptic encephalopathy with continuous spike-waves during slow-wave sleep (CSWS) is a spectrum of epileptic conditions best defined by the association of cognitive or behavioral impairment acquired during childhood and not related to another factor other than the presence of abundant interictal epileptiform discharges (IED) during sleep, which tend to diffuse over the whole scalp. It is part of the childhood focal epileptic syndromes, some cases being idiopathic and overlapping with benign rolandic epilepsy, and others being symptomatic of a structural brain lesion. Landau-Kleffner syndrome (LKS) is a particular presentation where acquired aphasia is the core symptom. Clinical, neurophysiological, and cerebral glucose metabolism data support the hypothesis that IED play a prominent role in the cognitive deficits by interfering with the neuronal networks at the site of the epileptic foci but also at distant connected areas. Therefore, the treatment should aim to suppress IED. This may be achieved using conventional antiepileptic drugs, but corticosteroids seem to have more pronounced and sustained efficacy. Outcome for epilepsy is usually good, CSWS being an age-dependent EEG pattern, whereas outcome for cognition, language, and behavior is variable. Rehabilitation represents an important part of the treatment and visual forms of language should be encouraged in children with LKS.

From reader reviews:

Gerardo Whittaker:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each book has different aim or perhaps goal; it means that book has different type. Some people experience enjoy to spend their the perfect time to read a book. They are really reading whatever they acquire because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book whenever they found difficult problem or even exercise. Well, probably you should have this Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology).

Vicky Moore:

Now a day people that Living in the era everywhere everything reachable by interact with the internet and the resources included can be true or not need people to be aware of each details they get. How people have to be smart in having any information nowadays? Of course the answer is reading a book. Reading a book can help men and women out of this uncertainty Information specially this Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology) book since this book offers you rich data and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you may already know.

Ashley Williams:

That reserve can make you to feel relax. This specific book Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology) was colorful and of course has pictures on the website. As we know that book Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology) has many kinds or category. Start from kids until young adults. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore not at all of book are generally make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that.

Josefina Roundtree:

Publication is one of source of expertise. We can add our expertise from it. Not only for students but also native or citizen have to have book to know the upgrade information of year for you to year. As we know those publications have many advantages. Beside many of us add our knowledge, can also bring us to around

the world. Through the book Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology) we can consider more advantage. Don't someone to be creative people? To be creative person must like to read a book. Just choose the best book that suitable with your aim. Don't be doubt to change your life at this book Pediatric Neurology Part I: Chapter 66. Epileptic encephalopathy with continuous spike-waves during slow-wave sleep including Landau-Kleffner syndrome (Handbook of Clinical Neurology). You can more attractive than now.
